

## Populating the Smithsonian Digital Repository

- Learn from the experience of others – don't count on authors to contribute
- Mediated deposit, the only hope for developing a substantial collection
- No Institutional mandate to deposit, but publication data is required for research metrics
- Library assumes role as manager of Institutional publication list
- Re-use metadata for repository content
- Re-use bibliography to dynamically create staff web pages (with links to repository content, where available). Value-added service.
