

# ETDs in an IR – a collaborative approach

- Electronic Theses and Dissertation program began Fall 2007
- Collaboration between Thesis and Dissertation Coordinator, Technical Services, and Repository Manager – all working in different departments
  - Developed workflow to pull metadata from DSpace into cataloging record and link to ETD document in the IR:
  - Thesis and Dissertation Coordinator deposits document, cataloging extracts metadata and populates cataloging record and links to ETD
- Technical requirements for ETDs necessitated code changes:
  - NTLDT metadata fields added to IR
  - Embargo functionality added on (guide for 1.4.2 on DSpace wiki)
- Ongoing working relationship between dept's.

**Think. Learn. Succeed.**
