

The **ARL Academy Advisory Group** is charged with fostering the development of an agile, diverse and highly motivated workforce, as well as the inspiring leadership necessary to meet present and future challenges in research libraries. The ARL Academy Advisory Group will develop a strategic agenda that supports continuing professional learning and development across the research library workforce.

The group will:

- Consult broadly across both the ARL and global library communities;
- Identify, explore and recommend new learning and development opportunities for inclusion in the ARL Academy;
- Advise on priority setting and resource allocation;
- Liaise with other ARL groups with a common interest in supporting the library workforce (e.g., the Diversity and Inclusion and Member Engagement and Outreach Enabling Capacity Committees); and
- Ensure that programs are assessed and re-evaluated on a regular basis.
